

Hello :) I am Daniel, a little about myself:

Recently I finish my studies as full-stack developer and I loved every moment of it.

I always enjoy to put my heart and soul in what I love to do, I find challenges very satisfying and I enjoy the fruits of hard work, if you will give me the opportunity ill be happy to join your journey.

Kiryat Gat

KLA

2014-2023

Working as integrator with multidisciplinary machines in the field of PCB. Part of my role was to debug problems and solve them. i worked closely with engineers and R&D, I lead the implementation of a new product, write procedure, did tests, and trained new employees. I gave support at customers sites with training, installing machines and solving problems. I loved to implement ideas for simplified and optimize process, like planing and building jigs and writing macros for excel files and more

Micron

2012-2013

Worked as equipment guy - solve problems with the machine and preform maintenance

Intel

2010-2012

Maintaining machines parts and logistics

Full Stack java - finished front end and back end course with avg of 97 at *John Bryce college*
